

From March 17 to May 3, 2022, Data for Progress conducted a survey of 664 likely voters ages 18 to 34 nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is ± 4 percentage points.

NB: subgroups with a n-size less than 30 (<30) are not shown on these cross-tabs. We choose not to display N<30 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=664 unless otherwise specified.

This report is for respondents: **18 to 34**

[1] When thinking about what actions the federal government should take on student loan debt, which of the following is closest to your view, even if none of these are exactly right?
